STEP 11 - POWDER COLOR (CHECK ONLY ONE)

- White Red Yellow Orange Blue Purple Green Custom

Note: The powder color “white” is translucent in water, not clear like water (i.e., nanoemulsion). Varying pH levels will change the original color of a powder in a liquid state.

STEP 12 - PARTICLE SIZE (CHECK ONLY ONE)

- 1 - 5 µm 10 - 25 µm 50 - 75 µm 100 - 125 µm 150 - 200 µm
- 5 - 10 µm 25 - 50 µm 75 - 100 µm 125 - 150 µm 200 µm +

* Micrometer (µm)

Note: This custom order request form helps us engineer a particle from scratch. The resulting powder is a collection of those particles. The particle size you choose encapsulates the formulation (i.e., Steps 1 - 11). If you choose to rehydrate the powder in a liquid state then the particle size may increase or transform to a nanoemulsion. Please take in consideration processing conditions like temperature, humidity, pH, flavor, form, consumption, and packaging.
